If this bill passes third reading in the house of introduction, a bill summary that applies to the reengrossed version of this bill will be available at <http://leg.colorado.gov>.)*

Current law in the "Workers' Compensation Act of Colorado" provides that certain cancers contracted by firefighters are considered occupational diseases presumed to have been a result of the firefighters' employment. A firefighter's employer or an insurer may rebut this presumption by showing by a preponderance of the medical evidence that the cancer did not occur on the job.

Shading denotes HOUSE amendment. Double underlining denotes SENATE amendment.  
Capital letters or bold & italic numbers indicate new material to be added to existing law.  
Dashes through the words or numbers indicate deletions from existing law.

**Section 2** of the bill updates the law by:

- Expanding the types of cancer that are considered occupational diseases;
- Affording certain neurological conditions the presumption; and
- Strengthening the presumption to require an employer to show clear and convincing evidence that the cancer did not occur on the job.

1 *Be it enacted by the General Assembly of the State of Colorado:*

2 **SECTION 1. Legislative declaration.** (1) The general assembly  
3 finds and declares that:

4 (a) Firefighters are routinely exposed to carcinogens, heavy  
5 metals, neurotoxins, and combustion by-products in the course of their  
6 duties, resulting in a significantly elevated risk of cancer and neurological  
7 disease;

8 (b) Colorado created a presumption regarding the occupational  
9 causation of certain cancers in order to provide greater protections under  
10 the "Workers' Compensation Act of Colorado" to recognize the risks  
11 firefighters are exposed to;

12 (c) Scientific and occupational health data demonstrate increased  
13 incidence of Parkinson's disease, multiple myeloma, non-Hodgkin  
14 lymphoma, and bladder and respiratory cancers among firefighters; and

15 (d) The presumption of occupational causation and protections  
16 within the "Workers' Compensation Act of Colorado" must be expanded,  
17 strengthened, and made conclusive to ensure fairness, prompt claims  
18 processing, and timely payment of benefits to firefighters with these  
19 conditions.

20 (2) Accordingly, the general assembly:

21 (a) Extends the presumption and protections within the "Workers'

1 Compensation Act of Colorado" to firefighters diagnosed with  
2 Parkinson's disease and related movement disorders;

3 (b) Mandates a presumption of occupational causation when  
4 benefits are claimed by a firefighter for certain cancers and neurological  
5 conditions, unless the presumption is rebutted by clear and convincing  
6 medical evidence; and

7 (c) Prevents an employer from using the absence of a prior,  
8 baseline medical examination as a basis to deny a firefighter's claim for  
9 benefits.

10 **SECTION 2.** In Colorado Revised Statutes, **repeal and reenact,**  
11 **with amendments,** 8-41-209 as follows:
